

Digital Land: Data Center Announcements and the Capture of Community-Created Value in Georgia

Damian Krotov

2026-07-04

1 Introduction

2 Background: Georgia's data center boom and Georgia's rent

3 Data

4 Empirical strategy

5 Results

The headline simple ATT on log home value is `TODO_RUN_P3` (95% CI `TODO_RUN_P3` to `TODO_RUN_P3`), across `TODO_RUN_P3` treated ZIPs against `TODO_RUN_P3` never/not-yet-treated controls.

(Event-study figure pending: run `make estimate` after verification.)

6 Robustness

7 Who bears the risk that the value never arrives?

(Fan chart pending: verify `refs/mc_params.json`, then run `make mc`.)

8 Limitations
